From SCCM to Intune - So the time is Now, but what about my apps?
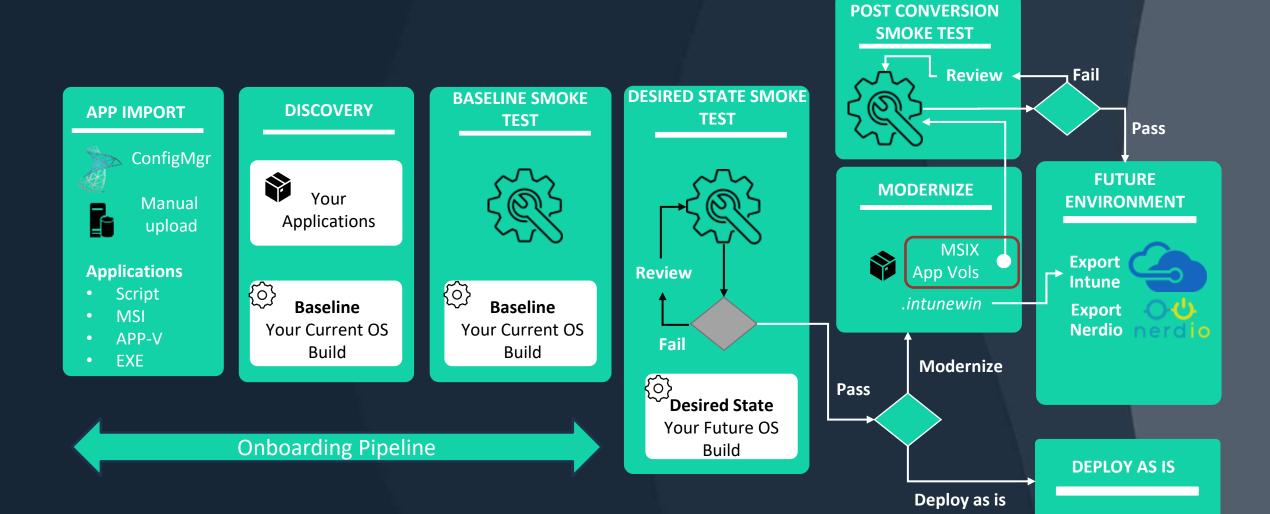

Dr James Graham - Field CTO

Cloud Endpoints Kickstarter Program with Rimo3

Join Rimo3's technical experts and experience the benefits of
- Automated SCCM to Intune application migration
- Automated Windows 11 application testing with support for custom image(s)
- Integrating automated application testing and management into an application delivery pipeline
- Using data to reduce application failures and improve end user experience
- Improve security posture by reducing time to deploy security updates

Engagement Milestones

Scoping:
- Deliverables overview
- Roles and responsibilities
- Agree plan and applications

Application Onboarding:
- Automated Discovery
- Automated Baseline
- Baseline application performance

Migrate Apps
- Select applications to be migrated
- Choice of application formats:
  AppVolumes | MSIX | .intunewin

Scope — **Deploy** — **Onboard** — **Test and Migrate** — **Report**

Rimo3 Deployment:
- Onboarding Workshop
- Rimo3 platform deployment
- Connection to your SCCM
- Onboard your custom image
- Onboard your applications
- Intune connection

Application Testing
- Onboard target image
- Windows 11 readiness with reporting
- Identify application failures

Closing Report
- Closing Workshop
- Knowledge Transfer
- Final report and closure
- Build migration plan
- Define next steps

Rimo3 Cloud Endpoint Kickstarter Packages

Freemium

- 5 Applications
- 10-day license
- Onboarding Workshop
- Custom image support
- SCCM import
- Windows 11 test
- Intune export
- Modern format conversion (MSIX/AppVols)
- Closing Workshop

£0

Premium

- 20 applications
- 30-day license
- All Freemium features
- AVD single and multisession testing
- Rimo3 SME support
- Additional workshops with Rimo3

£10k

AVD Kickstarter Program with Rimo3

Join Rimo3's technical experts and experience the benefits of
- Pre-production application testing to accelerate your cloud VDI deployment
- Using data to reduce application failures and accelerate your AVD deployment
- Integrating automated application testing and management into an application delivery pipeline
- Automated application conversion to MSIX, App Volumes or .intunewin

Engagement Milestones

Scoping:
- Deliverables overview
- Roles and responsibilities
- Agree plan and applications

Application Onboarding:
- Automated Discovery
- Automated Baseline
- Baseline application performance

Migrate Apps
- Select applications to be modernised for AVD
- Choice of application formats:
  AppVolumes | MSIX | .intunewin

Scope — **Deploy** — **Onboard** — **Test and Migrate** — **Report**

Rimo3 Deployment:
- Onboarding Workshop
- Rimo3 platform deployment
- Connection to your SCCM
- Onboard your custom image
- Onboard your applications
- Intune connection

Application Testing
- Onboard target image
- Testing single-session readiness for applications
- Testing multi-session readiness for applications

Closing Report
- Closing Workshop
- Knowledge Transfer
- Final report and closure
- Build migration plan
- Define next steps

Rimo3 AVD Kickstarter Packages

Freemium

- 5 Applications
- 10-day license
- Onboarding Workshop
- Custom image support
- SCCM import
- AVD single and multisession testing
- Intune export
- Modern formats (MSIX/AppVols)
- Closing Workshop
