# Disclaimer

The information in this presentation is for informational purposes only and may not be incorporated into any contract. There is no commitment or obligation to deliver any items presented herein.

The following presentation may contain product features that are currently under development.

This overview of new technology represents no commitment from VMware to deliver these features in any generally available product.

Features are subject to change, and must not be included in contracts, purchase orders, or sales agreements of any kind.

Technical feasibility and market demand will affect final delivery.

Pricing and packaging for any new technologies or features discussed or presented have not been determined.

This information is confidential.

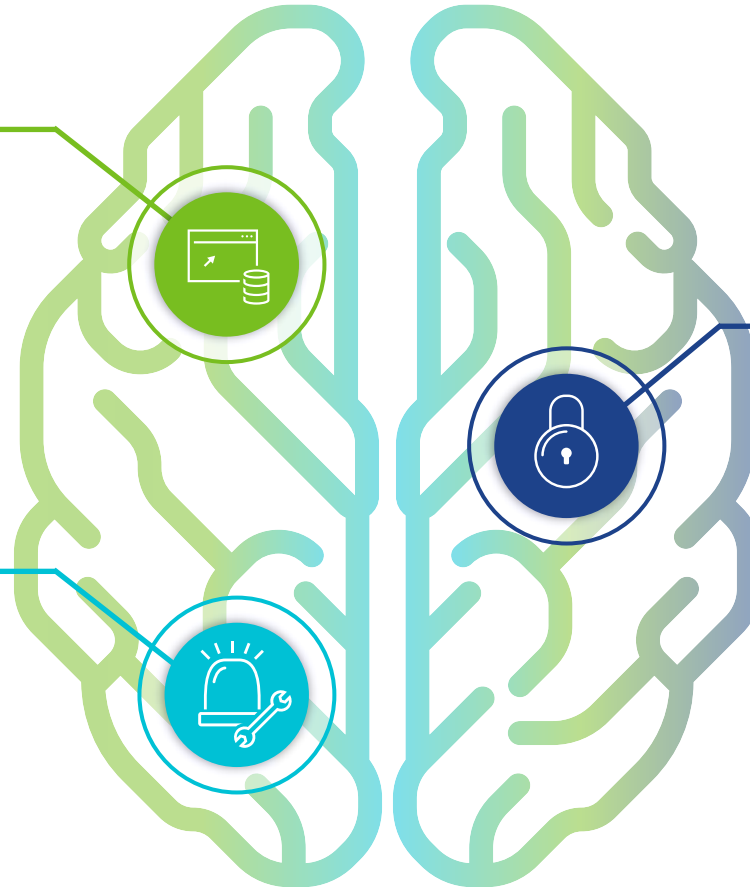

# The Autonomous Workspace Vision

## Self-configuring

- Compliance Onboarding
- Performance & Scale
- Cost

## Self-healing

- Better User Experience
- Lower MTTR
- More Efficient Helpdesk
- Long Range Planning

## Self-securing

- Visibility
- Remediation
- Compliance

# The Autonomous Workspace Vision

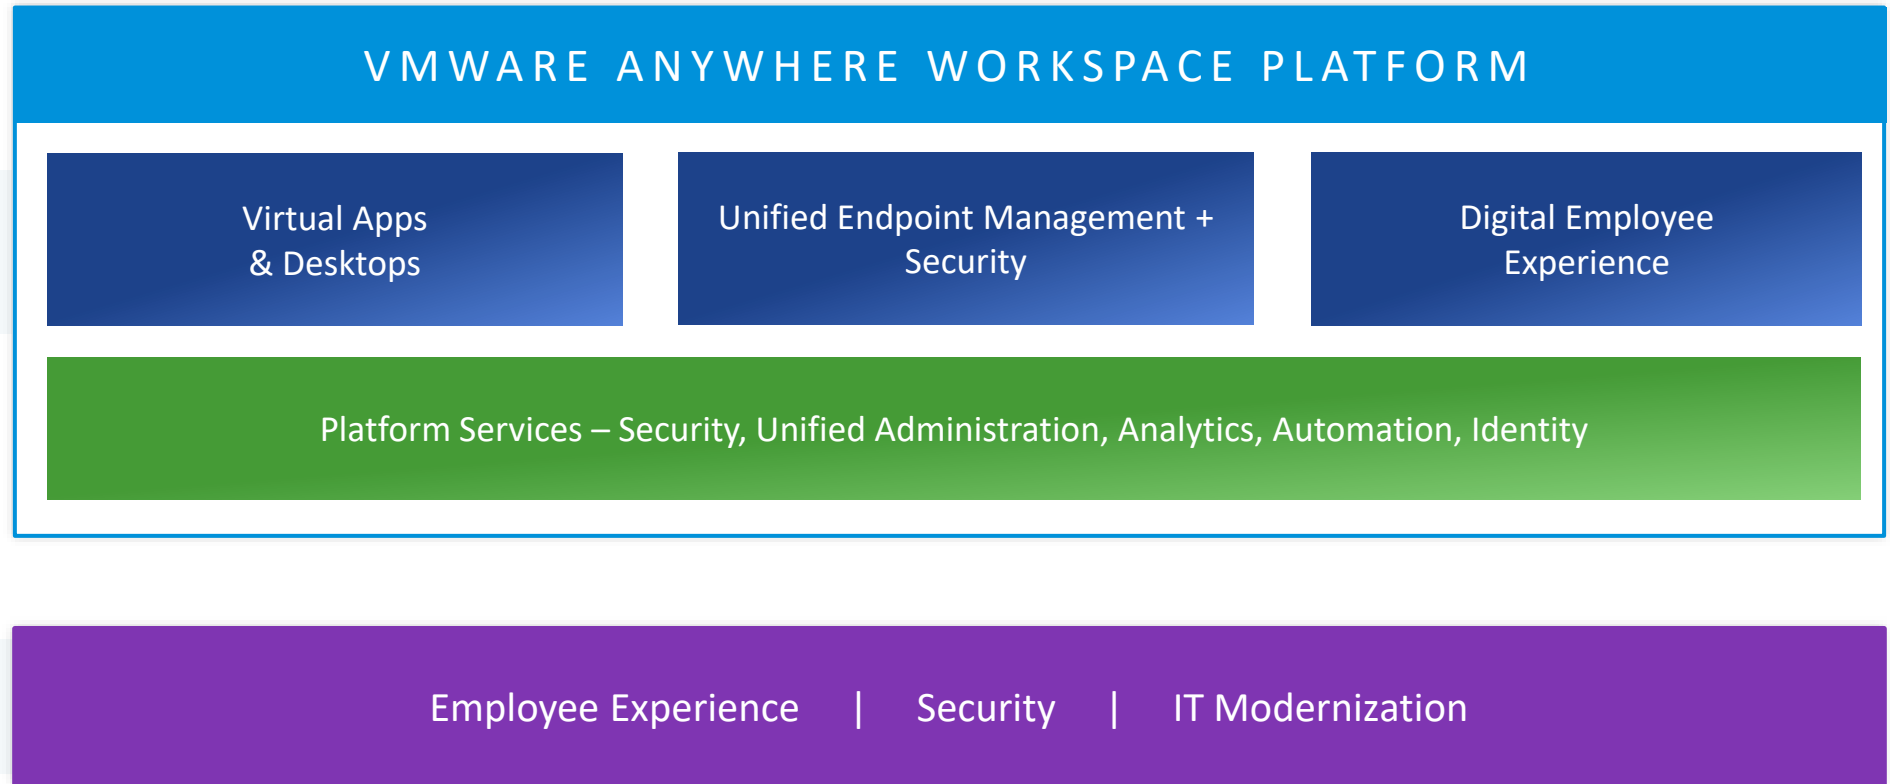

## TRADITIONAL

## AUTONOMOUS

Configure	<p>Set endpoint policies and controls</p> <p>Create virtual desktop delivery configuration</p>		<p>Define desired state of endpoint</p> <p>Auto Remote Exp and Infrastructure configuration</p> <p>Self-configuring</p>
Troubleshoot	<p>Troubleshoot workspace issues manually</p> <p>Resolve trouble tickets by elimination</p>		<p>Auto-healing and Self-service</p> <p>Guided RCA for faster resolution</p> <p>Self-healing</p>
Secure	<p>Lock down unauthorized access</p> <p>Patch vulnerabilities after the fact</p>		<p>Continuous access validation based on risk</p> <p>Prioritize remediation by vulnerability/risk level</p> <p>Self-securing</p>

# VMware Advances Autonomous Workspaces with AI-Powered Innovations

Providing a holistic approach to simplify and streamline hybrid work

## VMWARE ANYWHERE WORKSPACE PLATFORM

Industry Leading Solutions

Virtual Apps & Desktops

Unified Endpoint Management + Security

Digital Employee Experience

Platform Services – Security, Unified Administration, Analytics, Automation, Identity

Outcomes

Employee Experience | Security | IT Modernization

# Workspace ONE UEM updates

## Dropship Provisioning DIY – GA

Dropship provisioning tool can now be used directly by customers

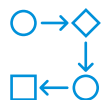

## Improved Windows update management - GA

New content sources, patch rollbacks and pause, enhanced sampling engine

## Declarative MDM for Apple – Coming Soon

Use fully declarative configurations for desired state management

## Freestyle for provisioning - GA

Enable workflows for macOS, Windows, and Linux drop ship provisioning

## Improved macOS update management - GA

New dashboard lists all updates and provides more flexible deployment

## Expanded Launcher deployment tracking – Coming Soon

Track changes, check-ins, failures, etc., for apps, profiles, and product provisioning

**Drop ship continuous audit for Windows and Linux - GA** By pre-registering devices, UEM has visibility during provisioning

## Baselines for macOS – Coming soon

Use security baselines with Freestyle, including during the provisioning process

**Shared Device Conditional Access with Microsoft Entra ID – GA** More flexible security for frontline and shared devices

# Industry-First Cloud-Native Integration with Intel vPro Accelerates Patch SLAs – Now in Beta

## Challenge

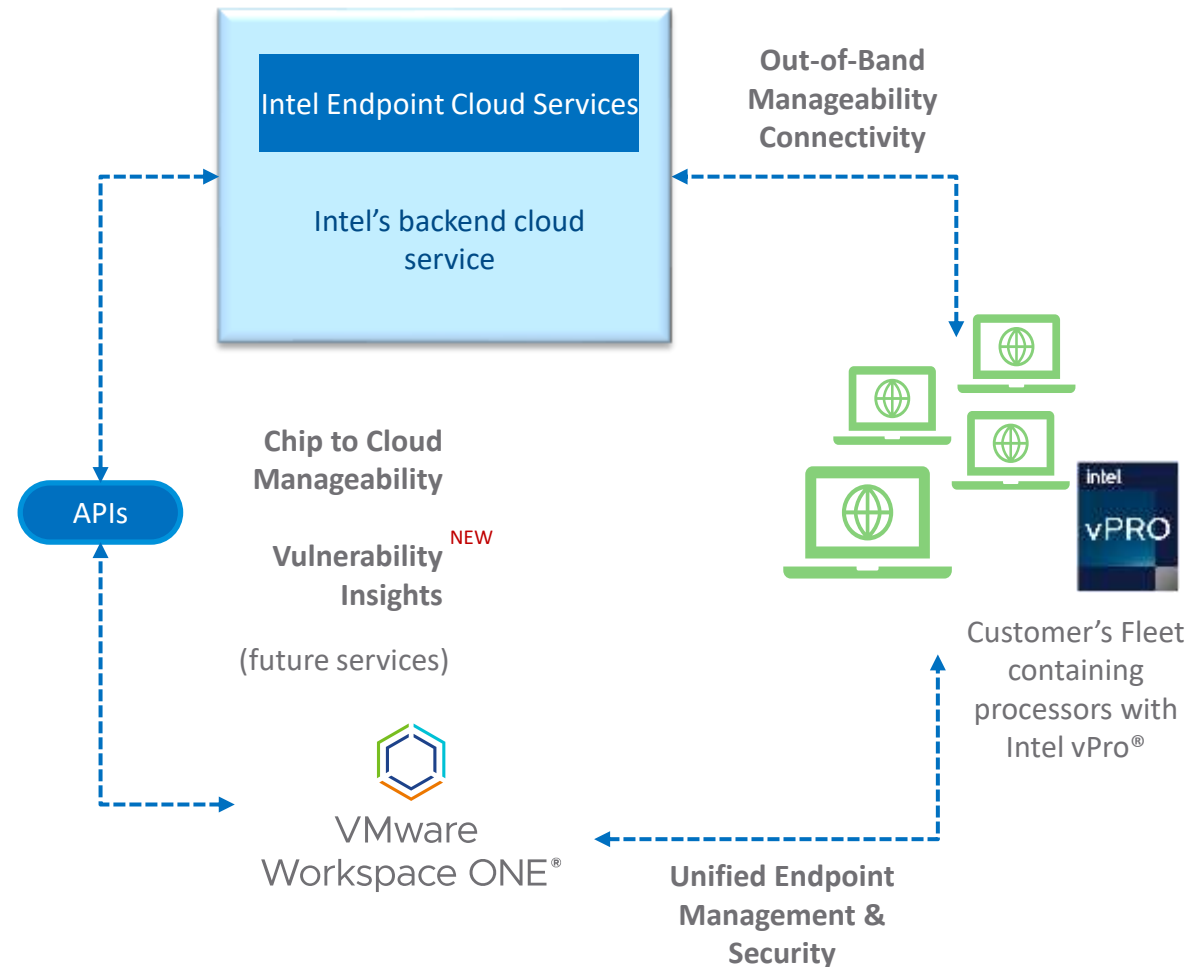

- Intel vPro management capabilities required additional infrastructure and management software (EMA)
- Remote or offline devices are difficult to patch
- Patching during working hours disrupts employees

## Solutions

- Intel vPro management capabilities are now integrated directly into Workspace ONE UEM (Beta)
- Devices with Intel vPro processors can be managed “out-of-band”
- IT can wake or power on devices and install patches

## Benefits

- Improve security and compliance without disrupting user productivity
- Faster and simpler deployment with cloud-based integration

# Vulnerability Management Dashboards and Scores – Coming Soon

## Challenges

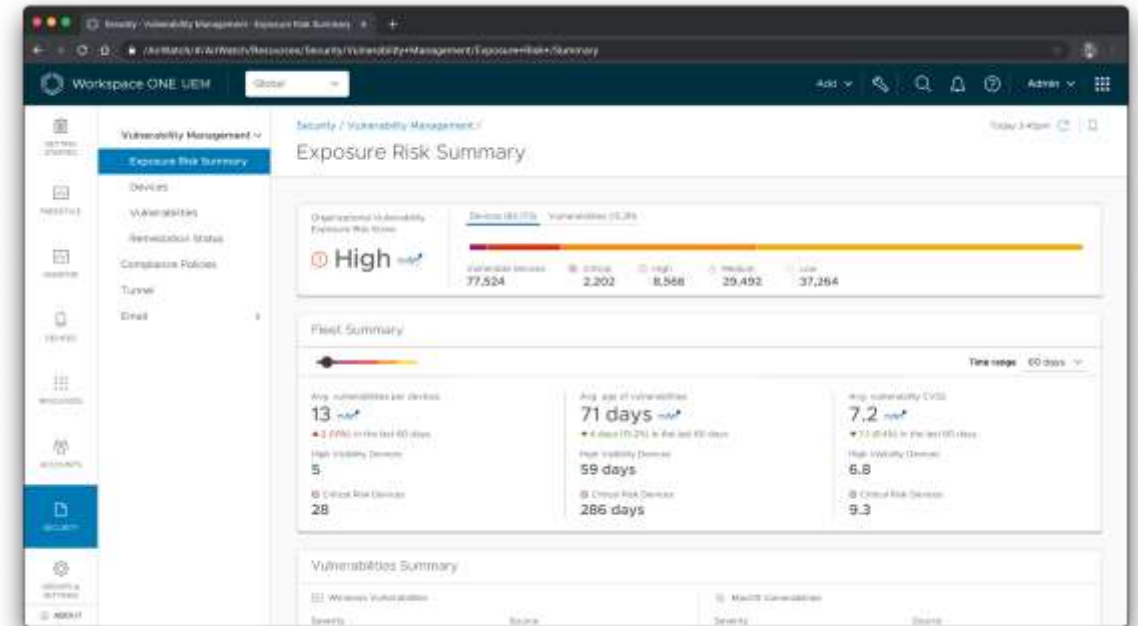

- Unpatched devices are a major security risk
- Large volume of vulnerabilities makes it difficult to prioritize and keep up with patches

## Solution

- Dashboards provide app, OS, and configuration vulnerability data in depth
- Aggregate multiple vulnerability feeds
- Scoring quantifies the risk
- Built in remediation and emergency patch workflows

## Benefits

- Comprehensive vulnerability management for better security and compliance

# Horizon Updates

## XR Hub, Horizon, and Nvidia CloudXR

**collaboration – GA** Use Horizon and XR Hub to deliver XR applications on Nvidia CloudXR experience to XR devices

## VMware Horizon on Alibaba Cloud VMware

**Service – GA** Horizon multi-cloud options expand with this latest offering

## Public Preview of VMware Horizon with

**Windows 365** Horizon value add on top of Windows 365 now available for public preview

VMware Horizon®

## Horizon NIAP Common Criteria Certification – GA

Horizon Client, Agent, Connection Server and UAG are certified with Common Criteria compliance from NIAP

## Horizon Accelerator – GA

Leverage Horizon Pros and data-driven Horizon Control Center to augment IT teams

## Experience Management for Horizon – GA

Additional telemetry for in-guest monitoring, and Insights for logon time

# VMware Explore 2023 Barcelona End-User Computing Announcement Recap

## Digital Employee Experience

**Workspace ONE DEX now supports Apps on Demand – Coming soon in Beta**

**DEX Application License Optimization – Coming soon in Beta**

**Workspace ONE Digital Employee Experience now supports Zoom QSS (Quality of Service Scoring) – Coming soon in Beta**

## Unified Endpoint Management + Security

**Integration of Intel Device Health and Workspace ONE – Coming soon in beta**

### Next-Gen macOS Management

- Third-party security baselines – Coming soon in Tech Preview
- Hub Health – coming soon
- macOS updates dashboard – GA
- Freestyle Orchestrator support for macOS – Ongoing enhancements

## Virtual Apps and Desktops

### New Horizon Control Plane SaaS Services

- Active VDI Agent Technology – Coming soon
- Active VDI Client Technology – Tech Preview coming soon

### Expanded App Volumes support – Status updates:

- Persistent virtual desktops (Now in Beta)
- Azure Virtual Desktop (Now GA)
- Amazon AppStream 2.0 (Now GA)
- Apps on Demand support for Horizon Cloud next-gen (Coming soon – same as Las Vegas)

**App Volumes with Apps on Demand Trial Now Available on Azure Marketplace and AWS Marketplace**

**VMware Aria Ops and Horizon Network Performance Integration – Coming soon**
