Azure Virtual Desktop

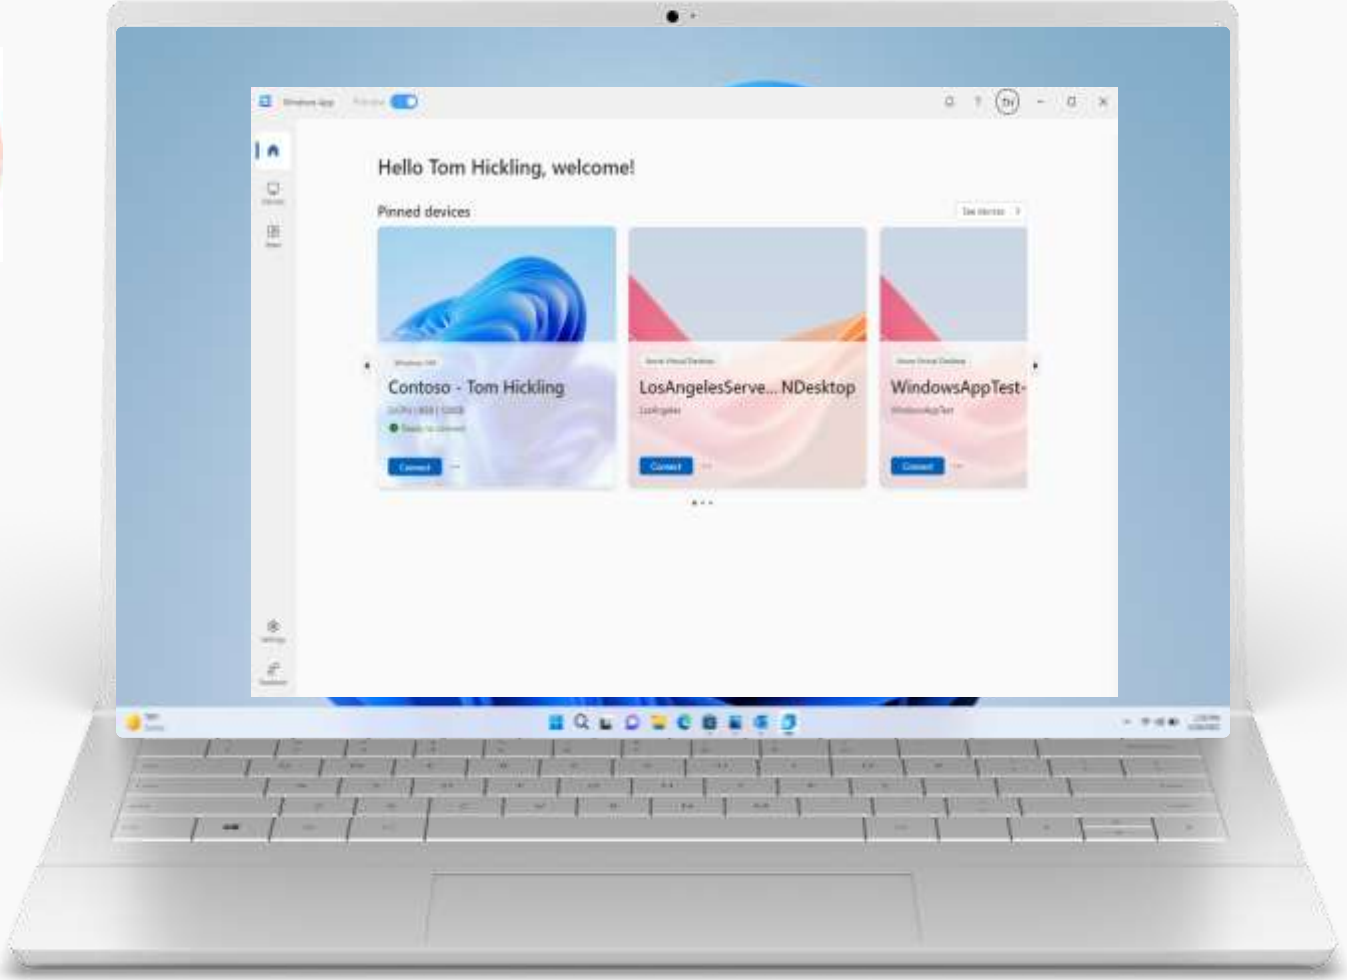
Contextual client device redirection Via Intune

Create client device redirection policies for the Windows App and the Remote Desktop client in Intune that

Check for group membership and device status

Results in differing settings for users/devices to the same host pool.

Supports Windows, iOS and Android with the Windows App and Remote Desktop client to AVD & W365



Hello Tom Hickling, welcome!

Public Preview May 2024

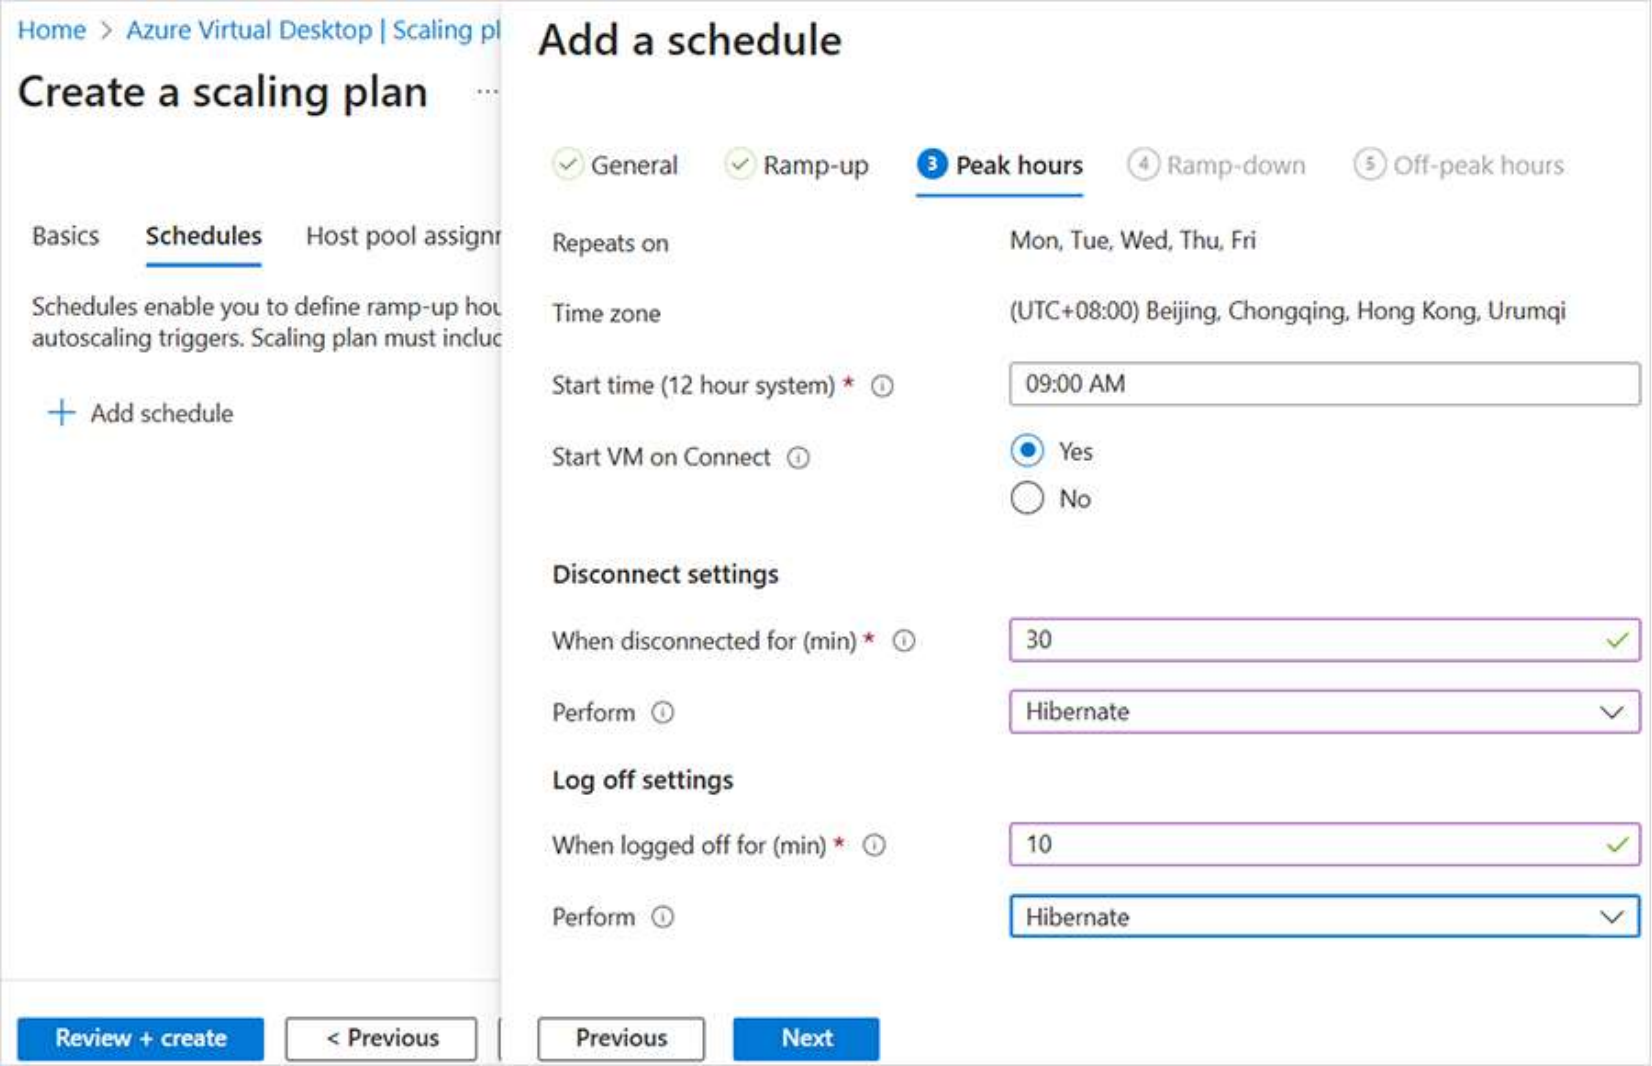
Hibernate and resume with AVD autoscaling for personal host pools

AVD Autoscaling supports hibernating personal host pool VMs

This writes memory to disk and the VM is deallocated. On Resume the memory is re-hydrated

Can be set on either the disconnect or log off events

Not charged for the compute cost of a deallocated Virtual Machine



Create a scaling plan ...

Schedules enable you to define ramp-up hou autoscaling triggers. Scaling plan must incluc

Add a schedule

Repeats on	Mon, Tue, Wed, Thu, Fri
Time zone	(UTC+08:00) Beijing, Chongqing, Hong Kong, Urumqi
Start time (12 hour system) * ⓘ	09:00 AM
Start VM on Connect ⓘ	● Yes ○ No

Disconnect settings

When disconnected for (min) * ⓘ	30 ✓
Perform ⓘ	Hibernate

Log off settings

When logged off for (min) * ⓘ	10 ✓
Perform ⓘ	Hibernate

Generally Available May 2024

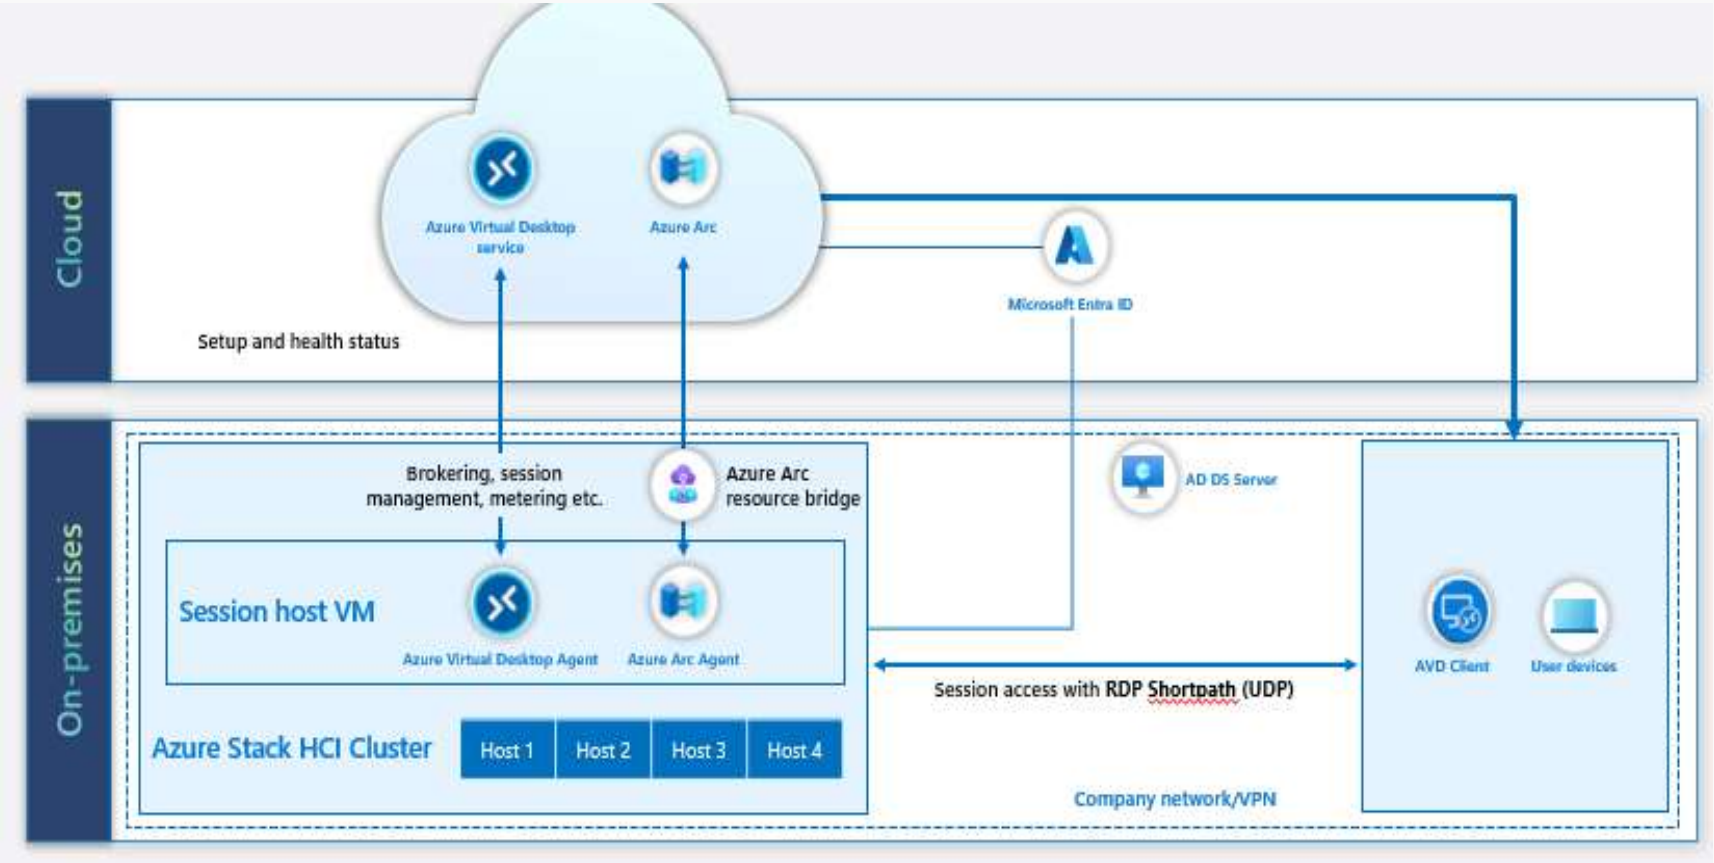
Autoscale and Start VM on Connect for AVD on Azure Stack HCI

AVD on Azure Stack HCI, an on prem converged set of infrastructure for Hybrid cloud capabilities already GA in Feb 2024

AVD Autoscaling and Start VM on connect now work on Azure Stack HCI

Supports both Personal and Pooled host pools

Allows you to save the Azure Virtual Desktop Stack costs of running VMs



Public Preview April 2024

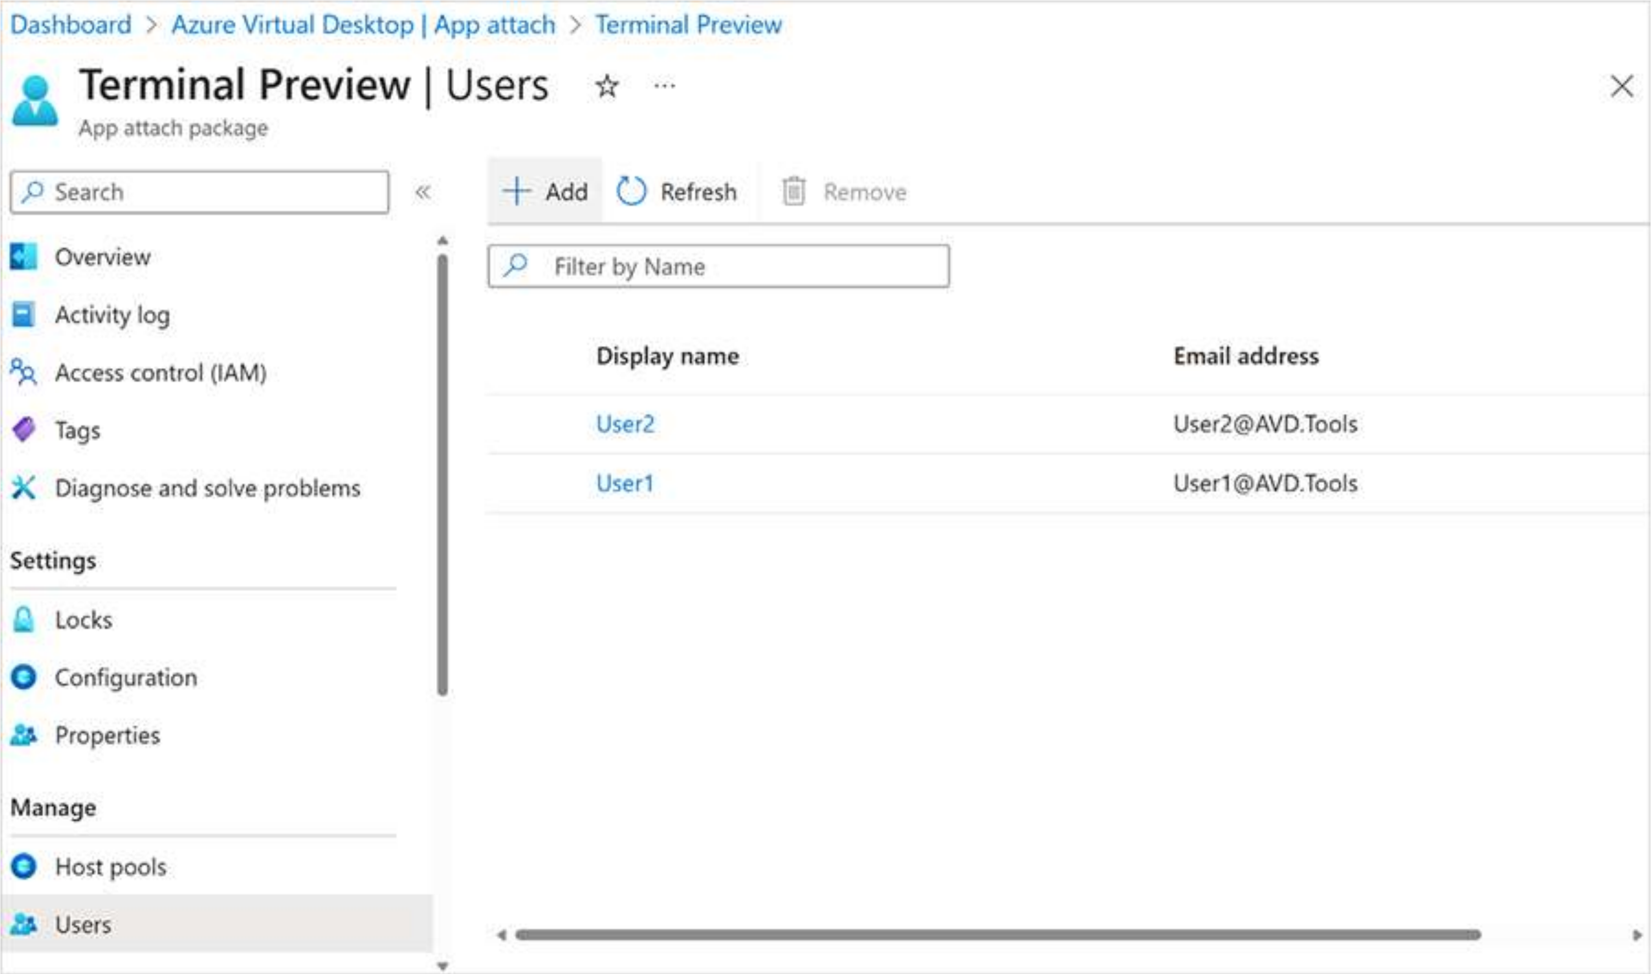
App attach new features

Apps assigned to:
Any host pool or session host
The same app to multiple host pools
Assigned directly to users

Does not require an AVD Application Group

Supports EntraID not just AD

Easier management more efficient less host pools and images to manage



Display name	Email address
User2	User2@AVD.Tools
User1	User1@AVD.Tools

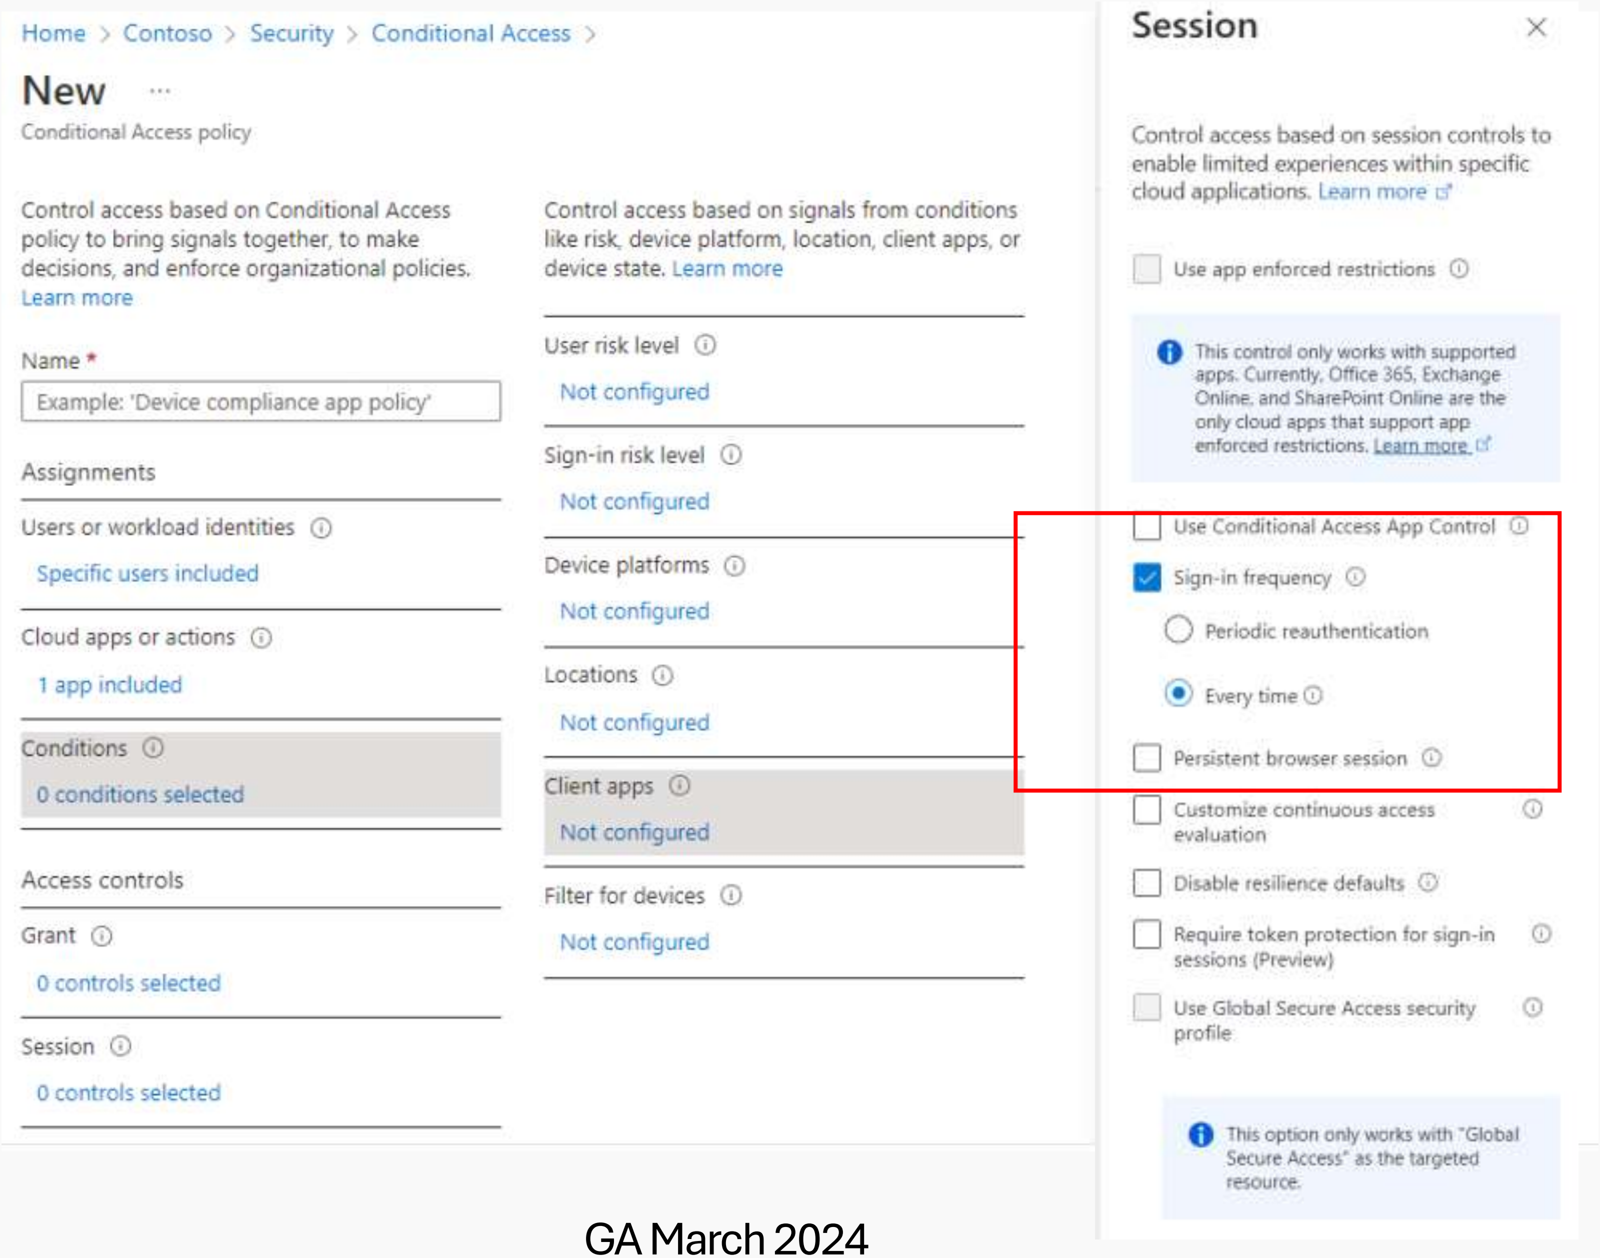
GA May 2024

Conditional Access Policy "every time" enforcement

Conditional Access policy minimum application threshold was 15 minutes.

This can now be set to every time.

So whenever a subscription, a feed refresh, new session, reconnection, network disruption the user is required to prove their identity again.



Home > Contoso > Security > Conditional Access >

New ···

Conditional Access policy

Control access based on Conditional Access policy to bring signals together, to make decisions, and enforce organizational policies. Learn more

Session ✕

Control access based on session controls to enable limited experiences within specific cloud applications. Learn more

□ Use app enforced restrictions ⓘ

This control only works with supported apps. Currently, Office 365, Exchange Online, and SharePoint Online are the only cloud apps that support app enforced restrictions. Learn more

□ Use Conditional Access App Control ⓘ

☑ Sign-in frequency ⓘ

○ Periodic reauthentication

● Every time ⓘ

□ Persistent browser session ⓘ

□ Customize continuous access evaluation ⓘ

□ Disable resilience defaults ⓘ

□ Require token protection for sign-in sessions (Preview) ⓘ

□ Use Global Secure Access security profile ⓘ

This option only works with "Global Secure Access" as the targeted resource.

GA March 2024

Clipboard copy direction and data types

You can now specify unidirectional clipboard redirection providing enhanced security

You can prevent copying into your session or to the local device depending upon your security stance.

Specify the data type that can be copied:
Allow plain text only.
Allow plain text and images only.
Allow plain text, images, and Rich Text Format only.
Allow plain text, images, Rich Text Format, and HTML only.
